PREVENT · DETECT · RESPOND

## Leadership for Operational Excellence

### **AT SAFETY BOSS INC. WE BELIEVE THAT:**

*“Operational Excellence is defined as a productive and profitable operation performed safely and efficiently”.*

### **OUR ADVANTAGE:**

It is generally accepted that 80-90% of all incidents are caused by human behavior. There are at least two ways to address behavioral issues. One way is to directly address these issues with:

- Reward for good behavior and punishment for unacceptable behavior
- Behavior modification exercises

**THERE IS ANOTHER WAY. AT SAFETY BOSS WE BELIEVE THAT TO HAVE POSITIVE BEHAVIOR IN THE WORKPLACE WE MUST GET TO THE ROOT CAUSE OF WHY PEOPLE BEHAVE THE WAY THEY DO**

### THE PROGRAM COMBINES

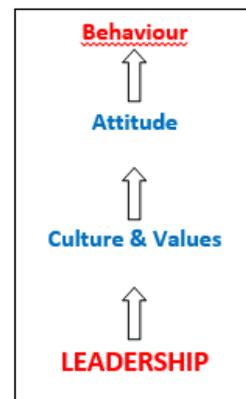

- Interdependent Safety Culture
- Leadership Development
- Interactive Workshops
- Field Coaching

We will be happy to discuss your challenges and how we can custom design a program which will address your values and operational needs.

Please contact any of our marketing team for more information and to schedule a full presentation with your team to see how Leadership for Operational Excellence can help improve your safety, productivity, and profitability.

### TRAINING OFFERED

- Behavior in the workplace is largely a manifestation of attitude. People with positive attitudes generally have positive behavior. The converse is also true.
- To promote positive attitudes within an organization we must ensure that we have developed a positive culture and made it sustainable.
- A positive culture would have descriptive words such as interdependent, supporting personal values, no blame, compliant, caring, having ownership, and loyalty.
- The positive culture becomes a paradigm – “That’s just the way we do things around here”.
- The initial development and maintenance of the positive culture must come from the workplace leadership. This could include superintendents, supervisors, managers, etc.
- We believe that effective, skilled and well coached leadership will ensure a positive culture is built and maintained. This will result in more positive attitudes among members of the team. These positive attitudes will be shown in the positive behaviors of all personnel. The result will be greater productivity, efficiency, and safety.
