RED DEER, Alberta

Gentlemen:

Re: Mesa Amoco Caroline  
5-28-34-6-W5M  
Blow out

---

With reference to the subject well, it is our opinion that Safety Boss Ltd. operated very professionally while gaining control of the gas and oil blow at the Caroline 5-28 well. They responded quickly to our call with men and equipment and were on stand-by throughout the danger period.

Control of the well was in the hands of the Mesa representatives but both Bob Sayers and Spence Buchan were very co-operative in assisting with all control procedures. It is my personal opinion that both of these men are capable of working under adverse conditions and both work very carefully, with safety being their main concern.

The equipment supplied by Safety Boss Ltd was well maintained and readily available. Our compliments on a job well done.

Yours truly,

MESA PETROLEUM (N.A.) CO.
