Attention: Mr. Mike Miller

Dear Sir:

Re: Well Blowout at 6-18-49-17 W5M near Edson, Alberta

LAC Minerals Ltd. wishes to express sincere thanks to Safety Boss for the services and expertise provided at the above referenced incident during September of this year.

The skill and enthusiasm demonstrated by the Safety Boss team was well received by all parties on the lease, and was paramount to a rapid and successful capping of the subject well.

As an employee and representative of LAC on the well, I would strongly recommend Safety Boss to anyone in need of your services. In addition to providing and carrying out sound technical advice, Safety Boss demonstrated an ability to handle numerous health and safety aspects of the capping operation. This included supervision of third party contractors, providing safety information for the press, and dealing with provincial government bodies.

By completing the entire capping operation in less than a week, Safety Boss also proved to be cost conscious and effective at the same time.

Please feel free to have any prospective clients call me if they would like a detailed recommendation.

Yours truly,

LAC MINERALS LTD.

David B. Mitchell
