Corey Dool

Field Sales Representative

Safety Boss

To Whom It May Concern:

Safety Boss was contracted to provide safety support during a 100 man / three week turn around at the Husky Hussar Processing Plant in June of 2014. Safety Boss provided 4-5 individuals to oversee confined space entries, onsite medical support, and a "Lead or Roving Advisor" to oversee Safety Boss's performance and function as the direct contact between Husky and onsite contractors on safety related issues.

Safety Boss performed in a professional manner throughout the turnaround and met all our expectations in terms of providing safety support.

Please don't hesitate to contact me directly if you have any further questions.

Sincerely,

Kasy Kaczanowski
