

To Whom it may concern:

This past year Keyera Ricinus Gas Plant has had the enjoyable experience working with SafetyBoss through the 2019 Ricinus Gas Plant Turnaround that took place September 3<sup>rd</sup> to the 14<sup>th</sup> 2019. SafetyBoss has shown great leadership and professionalism within their management team. The field level employees have demonstrated great skill and training within their job scopes from Safety Watch, Spark Watch, Confined Space Entry to NORM and Benzene testing.

We did find the SafetyBoss equipment very well maintained, serviced and in good repair, where we made special or short notice requests to SafetyBoss we did find their team was willing to do what they could to accommodate. I would recommend SafetyBoss for your Oil & Gas Safety Needs.

Sincerely, Marty Cuffe
