70 YEARS OF EXPERIENCE

Smokey Fire Trucks are the only Custom Fire Trucks specifically designed for the largest possible demands in the Oil and Gas Industry.

Personnel safety is our number one priority in an emergency situation. The Smokey Fire Truck is equipped for their safety during evacuation as well as equipment salvage and recovery after.

Exceptional Fire Fighting Equipment and Personnel

One Smokey Fire Truck is adequate for the largest Frac Operation with a minimum of 400 bbl (48 kl) of On-Site Water as well as additional Firefighters depending on the operation.

The shower unit has three independent decontamination/shower stations complete with shower-head, eye-wash basin and deluge hose. The whole system is fully compliant with ANSI/OHSA/WCB specifications. Also, each unit is capable of full containment of contaminated fluids. Our firefighters are the most highly trained in the industry and qualified to handle the largest fires.
